Megathon X: Singularity

Submission Deliverables

Deadlines

Stage	Deadline	Deliverables
M1	10:00 PM, 10th October	Approach PDF
M2	4:00 AM, 11th October	Progress report PDF, code push
Final	11:00 AM, 11th October	Code, final report PDF, demo video, code zip
Slides	11:30 AM, 11th October	Slides PDF

1. General Rules

- All documents, including slides, must be submitted as **PDF**.
- All PDFs (except slides) must be committed to your team's repository in a folder named `deliverables/`, using the exact file names given below. Do not delete earlier deliverables.
- Only the default branch (`main`) is evaluated. At each deadline, the latest commit on `main` is recorded; anything pushed after the deadline is ignored.
- There is no grace period for any deadline.
- No or late M1 or M2 results in direct disqualification. No or late final submissions will not be considered for further rounds of evaluation.
- Write your **team number** at the top of every PDF. R0 is double-blind, so do not include team name, member names, or college names in any PDF or video.

2. M1: Approach (10:00 PM, 10th October)

- **File:** `deliverables/M1.pdf` **Page limit:** 2 pages
- Contents:
  - Problem statement and your understanding of it.
  - Idea or abstract.
  - High-level approach, pipeline, or architecture.
  - Planned testing methodology.

3. M2: Mid-submission (4:00 AM, 11th October)

- **File:** `deliverables/M2.pdf` **Page limit:** 2 pages
- Contents:
  - Current approach and changes since M1, if any.
  - Experiments run so far and their results.

  - Progress on testing.
  - Plan for the remaining time.

- **Code push:** push all code written so far to `main`.

4. Final Submission (11:00 AM, 11th October)

- **Repository** (`main`):
  - Full solution code.
  - `README.md` with setup and run instructions **only**, plus links to any externally hosted datasets or model weights. Do not explain the solution here.
  - `LICENSE` file (MIT License).
  - `deliverables/final_report.pdf` (max **3 pages**): solution, approach, features, and results.
- **Demo video** (max **4 minutes**): screen recording of your solution with a voiceover. Upload to Google Drive, set access to "Anyone with the link", and submit the link through the submission form. Links the judges cannot open count as missing.
- **Code zip**: zip of your repository, submitted through the submission form as a backup. Exclude `node_modules`, virtual environments, datasets, and model weights.

5. Slides (11:30 AM, 11th October)

- Slides (PDF) covering the problem, approach, solution, and results.
- Submit through the slides form. Repositories are archived at 11:00 AM, so slides cannot be pushed.

Form links will be shared on Discord. Queries: helpdesk or Discord.
